Short introduction of key areas of research:

The Department of Hemato-Oncology at University Clinical Hospital No. 1 in Lublin (USK1) is a hospital specializing in the diagnosis, treatment, and clinical research of hematological diseases. The clinical activity includes comprehensive oncological care, multidisciplinary treatment planning, and participation in national and international clinical studies.
USK1 has strong clinical and organizational experience in hemato-oncology and operates within a multidisciplinary clinical setting including close collaboration with radiology departments. The hospital has access to advanced imaging diagnostics, including whole-body CT, and experience in its clinical application. The team is actively involved in clinical research and has the capacity to train physicians and medical staff as part of educational and research activities.

Expertise / Commitment offered

Description of your expertise:	The Department of Hemato-Oncology at University Clinical Hospital No. 1 in Lublin (USK1) is a clinical unit with strong expertise in the diagnosis, treatment, and research of hematological malignancies and selected solid tumors. The department provides multidisciplinary cancer care and actively participates in clinical research activities at national and international level. USK1 has extensive experience in hemato-oncology, including the management of patients with leukemia, lymphoma, multiple myeloma, and gastrointestinal cancers. The team is involved in clinical studies, real-world data collection, and translational research projects aimed at improving cancer diagnostics and treatment outcomes. Within the context of the Horizon Europe Mission Cancer call focused on capacity building with and for Ukraine, USK1 is particularly interested in contributing to strengthening oncology research and clinical capacities, knowledge transfer, and development of sustainable collaboration between EU and Ukrainian cancer centres. The department is experienced in clinical study design, protocol development, and scientific dissemination, and is prepared to support harmonisation of clinical and research practices, as well as development of joint training and research initiatives. USK-1 is committed to supporting resilience building in oncology research and healthcare systems, particularly by contributing clinical expertise, educational activities, and collaborative research structures within international consortia.
Keywords specifying your expertise:	Hemato-oncology; clinical oncology; cancer research; capacity building; Ukraine collaboration; clinical studies; real-world data; multidisciplinary care; EU research networks.
Commitment offered:	☒ Research ☐ Demonstration ☒ Training ☐ Technology ☐ Dissemination ☐ Other:
